Quick-start tips

Yellow cells are yours. Only type in the yellow cells - everything grey calculates itself.

Enter every quote exactly as quoted. Put the full quoted price and every inclusion in the matrix so the best-price flag compares apples to apples.

Check the Pricing Key first. Compare each quote against the real-world spend ranges before you negotiate - knowing what is normal is your best leverage.

Rate what you loved. Use the rating column to capture your gut reaction from each meeting or tasting while it is fresh.
